

Raise Cleaner and Healthier Turkeys.

The VAL-CO TurkeyMAX System is flexible as it allows for use in starter houses, finishing houses or start to finish houses. The VAL-CO TurkeyMAX is easy to connect to the VAL-CO Watering System, when using the VAL Adapter Nipple.

From a hygienic point of view, the VAL-CO TurkeyMAX is a must for your house.

The angled rim helps prevent water from splashing on the floor. Another version of the VAL-CO TurkeyMAX is also available with a rounded edge (see inset photo on left) that helps to prevent bruising on the breasts of your birds.

If you're not convinced a bell drinker is right for your turkeys, we have a watering cup solution for you. Now you can have water access spread out through the house for all your birds. Each cup is a mini-reservoir that can satisfy 30 turkeys up to 7 weeks and 20 turkeys after 7 weeks. The BigTom Turkey Drinker System is small enough for poults, yet tough enough for big toms. And it's easier than ever to use. Simply raise the cups and the water pressure from the front of each line. That's all there is to it!

The VAL TurkeyMAX without the angled rim helps prevent bruising.

VAL-CO's new heavy duty inline cup, the BigTom, is rugged enough for even the most active birds!

Need Food Storage?

We offer a complete line of feed bins, available in any size that will suit your needs.

VAL-CO is your one-stop shop for all your poultry production needs.

PTF Turkey Pan Feeder - Adult

The PTF Turkey Pan Feeder is a multi-adjustable feeder that is easy to handle and gives excellent results. The ample and deep poly pan offers sufficient space for the growing turkeys, avoids feed waste and can easily be removed, exchanged or cleaned.

The PTF Turkey Pan Feeder Features:

- Self-leveling which allows feeder to swing, therefore reducing bruising.
- Steel feed level tube can be adjusted in seconds.
- Even feed distribution.
- Extra strength construction designed to withstand the movements of full-grown turkeys.

- ① Pan Shield
- ② Feed Pan Support With 3/16 Drive Rivet
- ③ Feed Pan Support - Swing Down With 3/16 Drive Rivet
- ④ Pan Shield Support
- ⑤ Drop Tube Assembly With Insulator
- ⑥ Galvanized Feed Level Tube
- ⑦ Feed Level Adjuster Ring
- ⑧ Plastic Pan
