

We've Made Pad Cooling Easier For You.

An Industry First

VAL-CO is proud to introduce the PolAIR EZ-Cool water return trough and evaporative pad support system which has the latest in evaporative pad cooling technology. This proprietary system is manufactured by VAL-CO and uses a unique, raised ribbed pad tray, molded directly into the trough which keeps the pad elevated above the drain holes allowing for 100% drainage with no spill-over from the tray. The design of PolAIR EZ-Cool trough greatly reduces installation and maintenance time with its unique quick-connect coupler and full 8" cleanout at the end of the trough.

Other features and benefits of the PolAIR EZ-Cool is:

- Unique combination of pad and trough allows for years of trouble free use.
- Quick connect coupler facilitates installation and provides flexibility for different length systems.
- Optional on-ground storage with minimum set-up time.
- New, easy-access top metal cover reduces service and maintenance time and directs all of the water onto the pad.
- Self-contained holding tank keeps foreign material out.
- Eliminates the need for metal troughs with liners and metal pad support trays.

The PolAIR Evaporative Pad Cooling System is a complete system available in 2 models: Extended, which allows for the pad material to be off-set from the wall by 10" and Flush, for direct installation onto the wall.
