

Keep Your Farm Germ-Free.

VAL-CO Sentry: Bio-Security for Trucks and Other Vehicles

Every day, poultry flocks are at risk to invisible killers that can survive in dust, droppings and debris, and hitch a ride on feed trucks, service trucks, catch trucks and other vehicles which enter your farm. Microbes (germs) can travel farm to farm on vehicles that have been to farms infected with diseases, bringing those germs to your farm and flock. Left untreated these germs not only affect your

production, but also can kill your flock, causing a catastrophic financial loss. To protect your farm and as part of your bio-security program, VAL-CO has developed the Sentry System - an automatic vehicle sterilization and disinfection system.

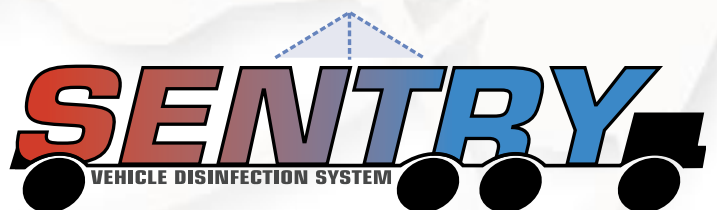

Installed at the vehicle entrance, the Sentry System automatically activates when a car or truck approaches the start sensors. Once activated, the driver slowly proceeds through the Sentry System where twelve specially designed nozzles cover the vehicle or truck with water and the disinfectant of your choice, effectively killing the germs before they can enter your farm. Designed to allow for entry of large feed and catch trucks, vehicles which frequently visit other poultry farms are effectively treated. Once the vehicle is ready to leave, it approaches the Sentry System and is treated again as it exits your farm - giving you peace of mind that you are doing your part to protect your flock and prevent the spread of germs.

The widespread pattern created by the specially designed nozzles ensures proper and full coverage of the vehicle.

Say "NO!" to the nasties!

VAL-CO continues to bring innovative designs to the agricultural industry.

The VAL-CO Family

- Watering Systems
- Feed Bins, Fill Systems
 - Feeders
- Nest & Egg Collection Systems
 - Cage Equipment
 - Lighting
- Brooders & Heaters
- Evaporative Cooling
- Fans & Other Ventilation
- Whole House Controllers™
 - Incinerators
 - Alarms
 - Flooring

Components of the VAL-CO Sentry System

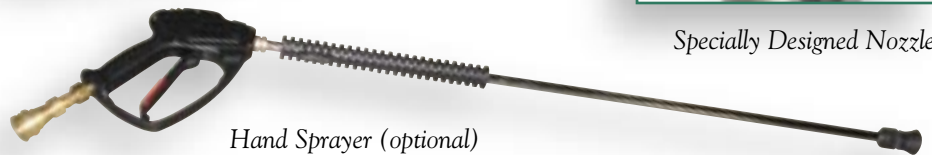

Offered as a complete system, the package includes the Sentry Pump and Filtration System, Sentry Fog Nozzles installed in Stainless Steel Tube, Automatic Sensors and Chemical Injector. You provide the disinfectant of your choice.

Sentry Pump

Specially Designed Nozzle

Hand Sprayer (optional)
