

HOMBRE™

The New Top Gun In Rodent Control

a d v a n c e d r o d e n t c o n t r o l t e c h n o l o g y

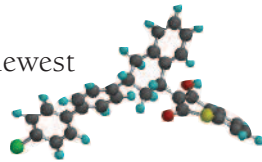

- Cornerstone for rotation.
- Most palatable, most effective rodenticide available.
- Stops the toughest disease-carrying rats and mice.

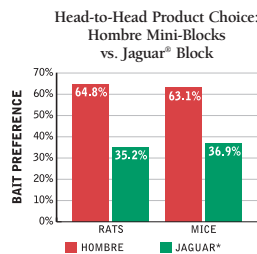

Hombre™, the cornerstone for rodenticide rotation!

Begin every rodenticide rotation program with Hombre. Next, use the rotation partners: **Hombre™ – BootHill® – Gunslinger™**

- Hombre technology, the newest single-feed anticoagulant, contains difethialone.
- Great taste – half the active ingredient of competitive baits combined with food-grade grains for maximum rodent acceptance.

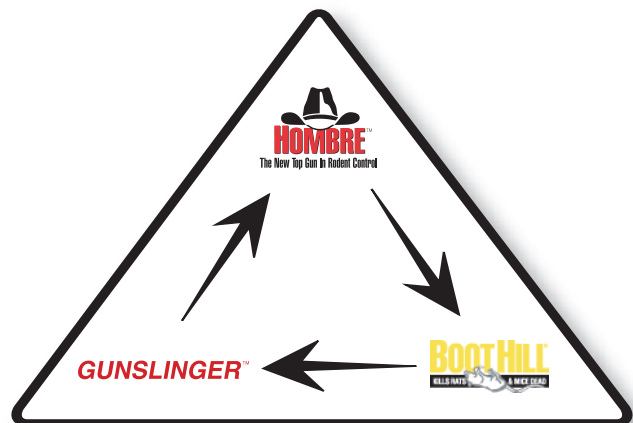

- Ounce for ounce, Hombre delivers superior rodent control.

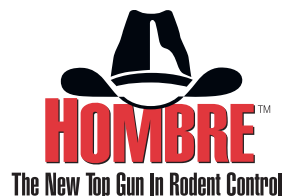

- ¾ oz. or 20 gm (one mini-block) can control 53 mice!
- Convenient, easy-to-use baiting options: new 1 lb. block, mini-blocks or pellets (bulk or place packs).
- More placements per container means cost-effective rodent control.
- USDA-authorized for rodent control in federal inspection programs.
- Vitamin K₁, same antidote as all other anticoagulants.

Packaged in easy-to-carry, resealable containers for maximum freshness and palatability.

Start every rodenticide rotation program with Hombre.
