

IMPORTANT!

This merchandise left our premises in prime condition. After unpacking the product, carefully inspect the product for any damage that may have occurred during transit. Check for loose, missing or damaged parts. On all product that sold F.O.B. Cokato, Minnesota, the title passes to the consignee upon receipt of the shipment by the carrier and ends our responsibility. The consignee should immediately file claims for loss or damage to the contents with the carrier as follows:

CONCEALED LOSS OR DAMAGE

Concealed loss or damage means loss or damage, which does not become apparent until the merchandise has been unpacked. The contents may be damaged in transit due to rough handling, even though the carton may not show external damage. When the damage is discovered upon unpacking, make a written request for inspection by the carrier's agent immediately on date of delivery. Then file a claim with the carrier since such damage is the carrier's responsibility. By following these instructions carefully, we guarantee our full support of your claims to protect you against loss from

VISIBLE LOSS OR DAMAGE

Any external evidence of loss or damage must be noted on the freight bill, express receipt or delivery receipts in the case of UPS shipments, and signed by the carrier's agent. Failure to adequately describe such external evidence of loss or damage may result in the carrier refusing to honor a damage claim. The carrier will supply the form required in filing a claim.

FILE YOUR CLAIM AS STATED ABOVE

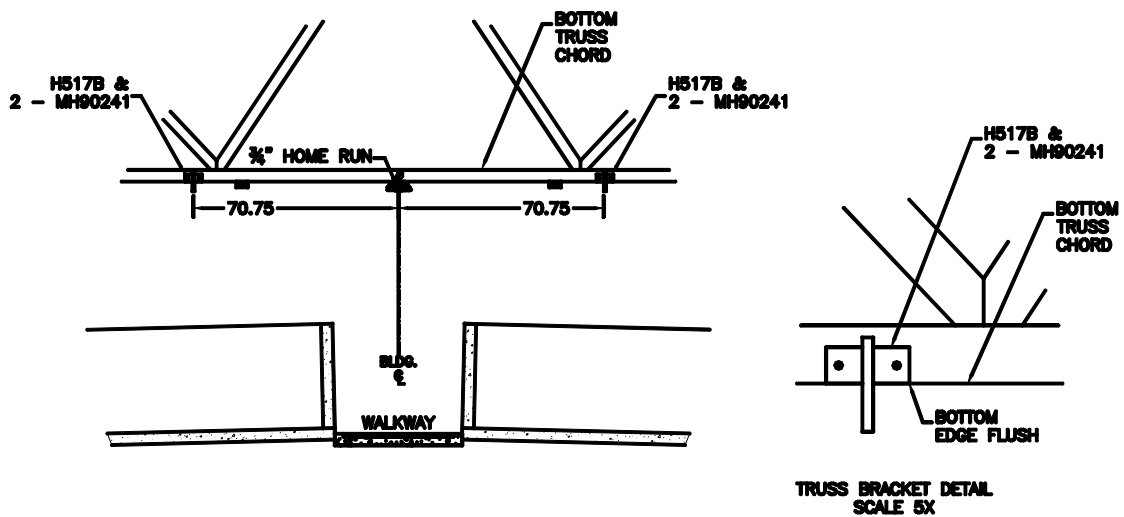

STEP 1.

Read through all steps completely prior to beginning each step. Unpack and become familiar with all parts and hardware supplied with the Radiant Heater Hanging Bracket Assembly.

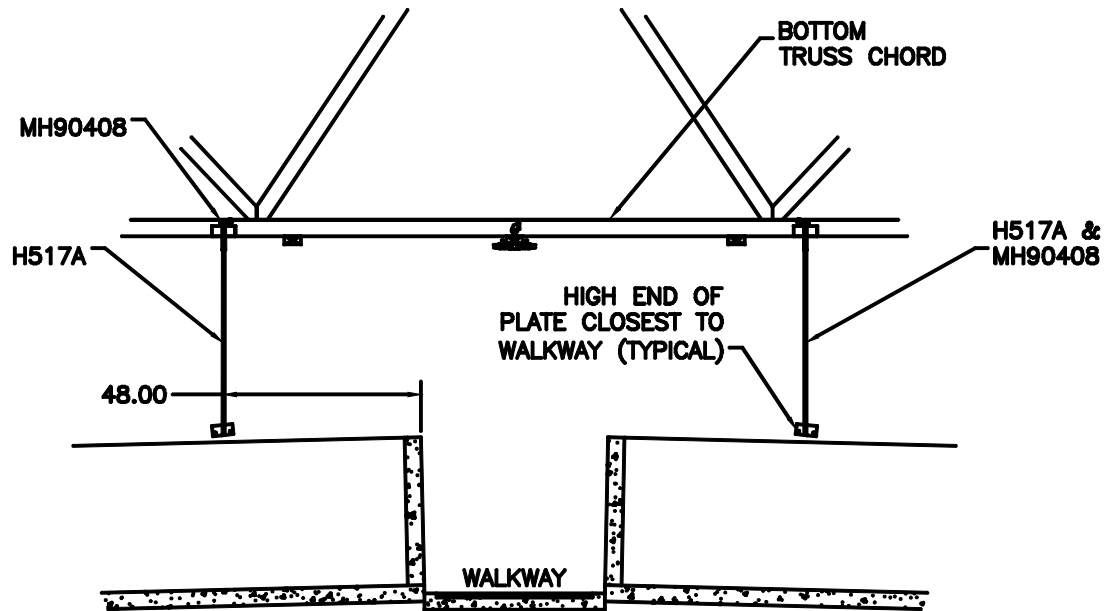

STEP 2.

On the truss closest to the center of the pen locate the position for the Truss Bracket (Part # H517B) on the bottom truss chord at 70 3/4" from the building center line. Using two #14 x 1 1/2" Screws (Part # MH90241) attach the Truss Bracket so the bottom edge is flush with the bottom edge of the bottom truss chord.

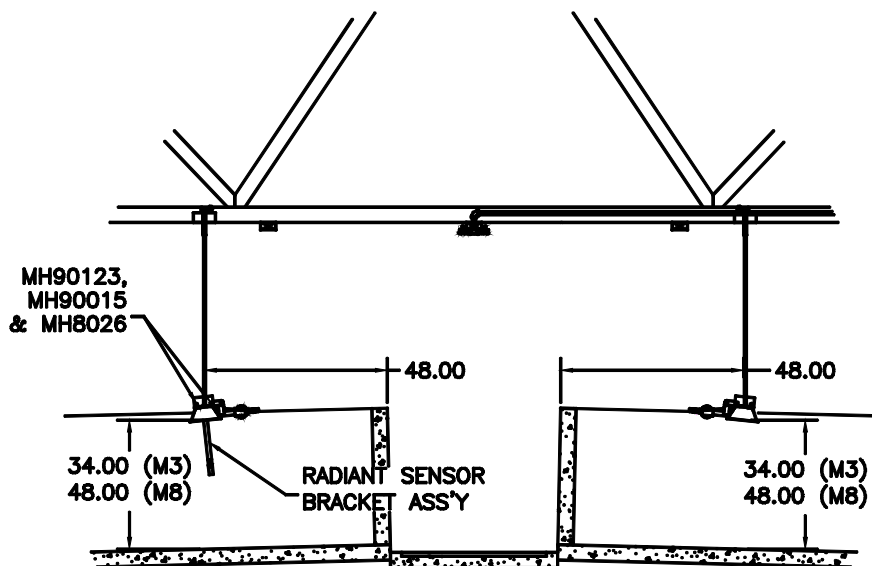

STEP 3.

Insert the top end of the Heater Rod Assembly (Part # H517A) into the square tube of the Truss Bracket from the bottom upward. Apply the Hitch Pin Clip (Part # MH90408) to the hole near the top of the Heater Rod Assembly for the M3 radiant heater and to the middle hole for the M8 radiant heater. Take care to position the rod & heater plate with the plate tilted as shown below.

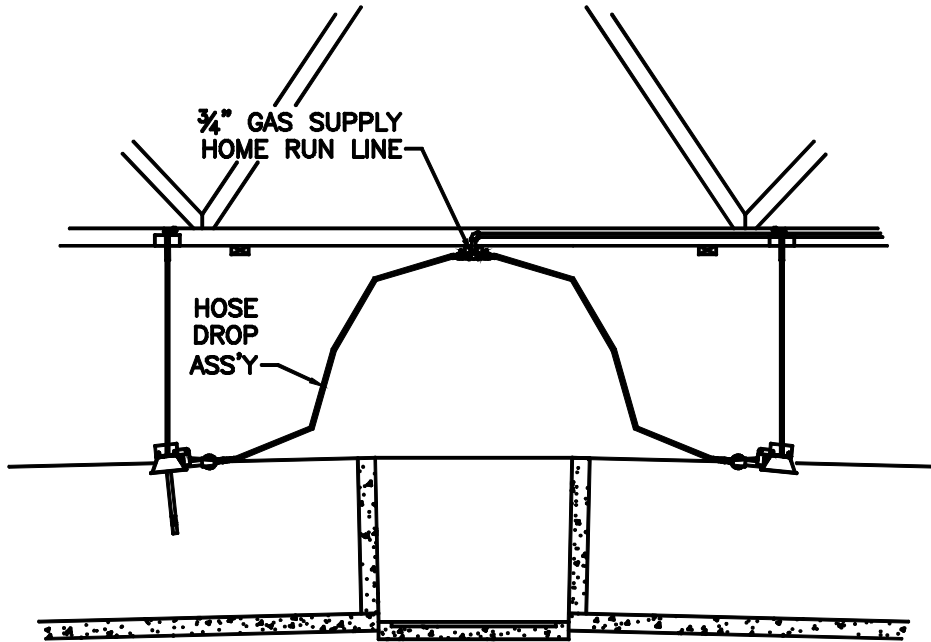

STEP 4.

With the Heater Rod Assembly in the lowered position (as set up in step #3) fasten the radiant heater to the heater plate on the Heater Rod Assembly using two #10-24 x 3/4" Screws (Part # HW-90), #10 Lock Washers (Part # MH8026) and #10 Hex Nuts (Part # MH90015). Refer to the drawing below for correct positioning of the heater. The M-3 heater intake screen assembly may need to be rotated 90 degrees to clear the heater rod mounting plate. Take care not to kink the copper tube when making this rotation.

STEP 5.

Connect the heater to the 3/4" Gas Supply Home Run Line with the hose drop according to local and national gas code.
