

Annihilator™

Premise Spray Insecticide

Product Description

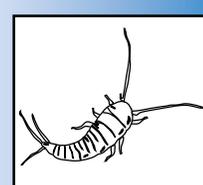

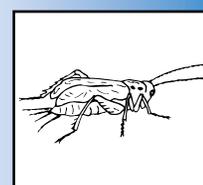

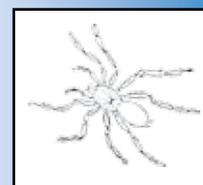

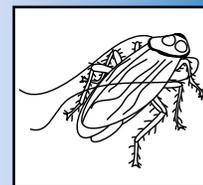

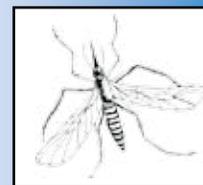

Annihilator™ Insecticide premise spray is a unique ready-to-use, long-lasting and fast-acting 0.02% deltamethrin insecticide for indoor and outdoor home use or for use in and around cattle facilities, poultry barns and horse stables. It is uniquely formulated to stick on surfaces and will not run like other water-based products.

Features & Benefits

- Kills a variety of pests on premises including house flies, stable flies, face flies, gnats, mosquitoes, fleas, horse flies, deer flies, cockroaches, ants, spiders, crickets and silverfish.
- Contains new generation pyrethroid chemistry with up to 30 days residual activity reducing the need for frequent spraying.
- Designed to provide superior control of insects as a crack and crevice treatment.
- Ready-to-use water-based formula that kills insects on contact.
- Has no odor, does not stain surfaces or fabric and leaves no oily residues.

Warning & Precautions

- Keep out of reach of children.
- Always read and follow label directions carefully.
- Do not spray on animals, humans, animal feed, watering equipment or fish ponds.

Name:

Annihilator™ Insecticide Premise spray

Code:

216311051

216311052

Size:

1 gallon (3.785 liters)

1 quart (.946 liters)

Application And Use Directions

Indoors	
Pests	How To Apply
Cockroaches (including adult and immature stages of both non-resistant and organophosphate and carbamate resistant strains), Ants, Booklice, Boxelder Bugs, Centipedes, Crickets, Dermestids, Firebrats, Fleas, Palmetto Bugs, Silverfish, Sowbugs, Ticks and Waterbugs	Apply as a spot, and crack and crevice treatment to areas where these pests crawl and hide, especially in hidden areas around sinks and storage areas, behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves, the underside of shelves, drawers, bookcases, and similar areas. Cover all food handling surfaces and cover or remove all food and cooking utensils or wash thoroughly after treatment. Exposed food should be covered or removed. Repeat as necessary but not more than once per week.
Ants	Spray ant trails, around doors, windows and other places where ants enter the house. Repeat as necessary but not more than once per week.
Carpenter Ants	For effective control locate and treat nests and surrounding areas. Apply around doors and windows and other places where ants enter premises and where they crawl and hide. Spray into infested wood through existing openings.
Ticks and Fleas on Surfaces	Remove pet bedding and destroy or clean thoroughly. Spray pet resting quarters. Adult fleas and larvae contacted by spray will be killed. Put fresh bedding down once spray has dried. Do not spray animals directly. For best results, pets should be treated with an appropriate flea and/or tick control product registered for use on pets before allowing them to return to the treated area. Spray rugs and carpets when infestations are bad. Delicate fabrics should be tested for staining in an inconspicuous area prior to use.
Silverfish, Crickets, Spiders	Apply along and behind baseboards to window and door frames, corners, pipes, storage localities, attics, crawl spaces and other areas over which these pests may crawl.
Centipedes, Ground Beetles, Pillbugs, Sowbugs, Scorpions and Ticks	Apply around doors and windows and other places where these pests may enter premises. Treat baseboards, storage areas and other locations where these pests are found.
Bedbugs and Lice	Remove linens and wash before reuse. Lightly spray mattresses, especially tufts, folds and edges. Apply to the interior of the frame. Allow to dry before remaking bed.
Flying Insects such as House Flies, Gnats, Mosquitoes and Small Flying Moths	Spray localized resting areas, such as under eaves, porches, inside surfaces of windows and door frames, surfaces around light fixtures and cords, railings, etc. and anywhere these insects may rest. Insects coming to rest on treated surfaces will be killed.
Horse Stables and/or Livestock Facilities to control Stable Flies, Horn Flies, House Flies, Face Flies, Horse Flies, Deer Flies, Mosquitoes and Gnats	Apply thoroughly to surfaces until wet. Insects coming to rest on treated surfaces will be killed or repelled. Repeat as necessary but not more than once per week. Do not spray animals or humans, or apply to animal feed or watering equipment.
Outdoors	
Pests	How To Apply
Crawling Insects such as Ants, Cockroaches (including Asian Cockroaches), Centipedes, Crickets, Mole Crickets, Water Bugs and Silverfish	Spray foundation of building where insects are active and may enter up to a height of 2 to 3 feet. Apply to outside surfaces of buildings where insects tend to congregate. Spray infested surface of patio or picnic area. Also spray legs of tables and chairs.
Ants	Spray freely around ant trails and hills. Spray around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray freely on and around debris. Repeat as necessary but not more than once per week.
Lone Star Ticks, Dog Ticks, Crickets and Fleas	Apply thoroughly to infestation in bushes, grass or weeds.
Wasps, Mud-daubers, Hornets, Yellow Jackets and Bees	Spray nests and other surfaces where bees may rest. Aim spray at nest openings. Applications should be made late in the evening when insects are at rest.
Flying Insects such as House Flies, Gnats, Mosquitoes, and Small Flying Moths	Spray outside surfaces of window and door frames and other areas where these pests may enter the home. Also spray localized resting areas, such as under eaves, porches, surfaces around light fixtures and cords, railings, etc. where these insects may rest. Insects coming to rest on treated surfaces will be killed.
Termites, Carpenter Ants and Carpenter Bees (for localized control only)	Apply Annihilator™ Insecticide Premise Spray to voids or channels in damaged wood of a structure, or to cracks, crevices and spaces in and between wooden portions of a structure or between wood and the foundation, in locations vulnerable to attack such as crawl spaces. Re-treat if needed but not more than once per week. For termites, the purpose of such applications is to kill workers or winged forms which may be present in the treated areas at the time of application. Not recommended as sole protection against termites. For active infestations, contact a professional pest control operator in your area.

Active Ingredient By Weight

Deltamethrin (s)-cyano-3-phenoxybenzyl-(1r, 3r)-3-(2,2-dibromovinyl)-2,2-dimethyl	
Cyclopropanecarboxylate	0.02%
Other Ingredients:	99.98%*
TOTAL	100.0%

*contains petroleum distillate

(See label for full use and precautionary statements)
