

DWR-F-1A

Air Inlet controller with potentiometer feedback

Features

1. Easy to program inlets
2. Simple procedure to edit existing programs
3. Show actual inlet opening percentage
4. Over-opening feature allows possibility to open inlets more than 100% during hot weather so that air can be dumped down on pen occupants. Both the amount of over-opening and temperature range in which it over-opens are adjustable
5. Summer and Winter can be programmed. Flip a Dip switch to select
6. Add a Temperature probe if you want to use the alarm outputs on the DWR-F-1A. (Optional)
7. All the Parameters selected can be locked so that non- authorised personnel cannot make change
8. Can be operated manually as well as automatically
9. Up to 12 DWR-F-1A's can be connected to one Ventilation Controller
10. The DWR-F-1A with a Expert 50 controller can be connected to selected probe for zoned inlets
11. Computer compatible
12. 115/230 Vac (50 & 60Hz) or 12Vdc
