### Skin contact

Immediately flush skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if irritation develops and persists. Wash contaminated clothing before reuse.

### Eye contact

In case of eye contact, remove contact lens and rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Get medical attention.

### Ingestion

Give several glasses of water. Never give anything by mouth to a victim who is unconscious or is having convulsions. Call a physician or poison control center immediately.

### Most important symptoms/effects, acute and delayed

Eye irritation. May cause allergic respiratory and skin reactions.

### General information

In the case of accident or if you feel unwell, seek medical advice immediately (show the label where possible).

## 5. Fire-fighting measures

### Suitable extinguishing media

Water. Carbon dioxide (CO<sub>2</sub>). Dry chemical.

### Unsuitable extinguishing media

None known.

### Specific hazards arising from the chemical

### Special protective equipment and precautions for firefighters

Wear self-contained breathing apparatus and protective clothing.

### General fire hazards

Dust may form explosive mixture with air.

## 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

Wear suitable protective clothing, gloves and eye/face protection. Avoid inhalation of dust. See Section 8 of the SDS for Personal Protective Equipment.

### Methods and materials for containment and cleaning up

Small Spillages:

Do not sweep. Vacuum material with appropriate dust collection filter in place. Be aware of potential for dust explosion when using electrical equipment. If vacuum is not available, lightly mist/wet material and remove by mopping or wet wiping.

Large Spillages:

Prevent further migration into the environment. Remove sources of ignition. Collect in a non-combustible container for prompt disposal. Local authorities should be advised if significant spillages cannot be contained.

**Environmental precautions** Prevent further leakage or spillage if safe to do so. Prevent spilled material from flowing onto adjacent land or into streams, ponds, or lakes.

## 7. Handling and storage

**Precautions for safe handling** Minimize dust generation and accumulation. Keep away from heat and sources of ignition. Avoid release to the environment.

**Conditions for safe storage, including any incompatibilities** Keep container tightly closed. Store in a cool, dry place with adequate ventilation. Keep away from incompatible materials, open flames, and high temperatures. Keep away from moisture. Avoid contact with oxidizing agents. Do not store in open or unlabelled containers.

## 8. Exposure controls/personal protection

**Exposure guidelines** Lilly Interim Exposure Guideline: <100 micrograms/m<sup>3</sup> TWA 12 hour (beta-D-mannanase)

### Occupational exposure limits

#### US. ACGIH Threshold Limit Values

Components	Type	Value	Form
Mineral Oil, technical grade white oil (CAS 8012-95-1)	TWA	5 mg/m <sup>3</sup>	Inhalable fraction.

#### US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value	Form
Mineral Oil, technical grade white oil (CAS 8012-95-1)	PEL	5 mg/m <sup>3</sup>	Mist.

#### US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value	Form
Mineral Oil, technical grade white oil (CAS 8012-95-1)	STEL	10 mg/m <sup>3</sup>	Mist.
	TWA	5 mg/m <sup>3</sup>	Mist.

**Biological limit values** No biological exposure limits noted for the ingredient(s).

**Appropriate engineering controls** Laboratory fume hood or local exhaust ventilation.

### Individual protection measures, such as personal protective equipment

**Eye/face protection** Wear goggles/face shield.

#### Skin protection

**Hand protection** Chemical-resistant gloves and impermeable body covering to minimize skin contact.

**Other** Chemical-resistant gloves and impermeable body covering to minimize skin contact.

**Respiratory protection** In case of inadequate ventilation, use respiratory protection. Select appropriate respirator for physical characteristics of material. Select respirator with appropriate protection factor.

**Thermal hazards** Not available.

**General hygiene considerations** In a manufacturing setting, wear chemical-resistant gloves and body covering to minimize skin contact. If handled in a ventilated enclosure, as in a laboratory setting, respirator and goggles or face shield may not be required. Safety glasses are always required.

Under normal use and handling conditions, wear goggles to protect eyes and wear impermeable gloves and protective equipment to avoid direct contact with skin. Wash thoroughly with soap and water after handling.
