Modification - Technical Description:

Revision 13

New Software version 1.4.3520

1- Added a setting to adjust the volume of the phone interface.
2- Fixed an issue when dialing phone numbers. In some case, a pause was needed after the phone number for proper operation. The Agri-Alert wasn't detecting the phone line correctly.
3- Fixed an issue where the auto test scheduling was calling randomly if the weekly setting was used.

Impact on the field and stock:

No impact.
