

QuickBayt Kills Flies Fast*

Use QuickBayt® Fly Bait to control nuisance flies in or around livestock production facilities, poultry houses, and horse stables

Fast-Acting

- Its red pellets attract and start killing nuisance flies in as little as 60 seconds*
- Contains the proven active ingredient imidacloprid

Effective

- Contains specially formulated mix of attractants
- Kills flies resistant to organophosphates and carbamates

Convenient and versatile

- Ready to use as scatter bait, but also easy to use in bait stations or as a paint-on
- Contains Bitrex®, a bitter substance that helps prevent accidental ingestion by animals
- Convenient package sizes for operations of any size

Read and follow product label directions before use.
QuickBayt products are for premise use only.
