

INCINERATORS

41

Agricultural Incinerators

1-800-328-8842

Efficient Combustion Technology

- Rapid incineration means low fuel consumption.
- Thick refractory lining in main chamber retains heat and increases efficiency.
- Waste can be incinerated as fast as it accumulates (under normal conditions with a properly sized unit).

Easy to Use

- Timer operation with auto-ignition (no pilots to light).
- Easier loading and ash removal with lower profile and improved doors.
- Single burner requires less maintenance.

Biosecure and Sanitary

- Achieve complete disposal of carcasses the first burn – no need to rearrange remains.
- Virtually eliminate smoke and odor (optional secondary burner available for use where required by regulation).
- Leaves only sterile white ash and brittle bone fragments.

Proven, Quality Incineration Since 1962

- Lower profile and modified base are stronger.
- Constructed of heat-resistant aluminized steel, stainless steel and industrial strength refractory.
- Continuous-welded bottom seams for added durability and no grates to replace.

CHORE-TIME®

Model A200

Burn Mizer™ Cremators

BURN MIZER

Burn Mizer™
Cremators Save
You Money.

Burn Mizer™ Cremators by VAL-CO™ destroy disease and reduce odor by incinerating 100 lbs. (45 kg) of carcass waste to one gallon (3.8 liters) of sterile ash with little or no unpleasant odors or smoke. Out cremators offer lower fuel costs than other national brands. Pre-cured refractory liners reflect heat (upto 3000° F / 1649° C) to increase efficiency. Choose from among nine models with capacities from 100 to 1200 lbs. (45 to 544 kg). Optional winched doors are available. Door may be reversed at no extra charge. Burn Mizer™ meets or exceeds US EPA guidelines.
