ThreAMINO® L-Threonine, Feed Grade 98,5%

1. Identification

1.1. Product identifier

Trade name ThreAMINO®

L-Threonine, Feed Grade 98,5%

CAS-No. 72-19-5

1.2. Recommended use of the chemical and restrictions on use

Relevant applications identified Feed additive

1.3. Details of the supplier of the safety data sheet

Company Evonik Corporation USA

299 Jefferson Road

Parsippany, NJ 07054-0677

USA

Telephone 973-929-8000

Telefax 973-929-8040

Email address Product-Regulatory-Services@Evonik.com

Services

2. Hazards identification

2.1. Classification of the substance or mixture

Classification according to Regulation 29CFR 1910.1200

Remarks

Not a hazardous substance or mixture.

2.2. Label elements

Statutory basis Classification according to Regulation 29CFR 1910.1200

Remarks Not a hazardous substance or mixture.

Supplemental hazard information / Label elements

Contains Residual , L-Threonine

The following percentage of the mixture consists of ingredient(s) with unknown acute toxicity: 99.5 %

+1 703-527-3887 (collect calls accepted)

2.3. Other hazards

May form explosive dust-air mixture.

Inhalation No hazard expected in normal use.
Skin No hazard expected in normal use.

US-GHS(P27/001) / 22.04.2015 18:58

ThreAMINO® L-Threonine, Feed Grade 98,5%

Eyes No hazard expected in normal use. Ingestion No hazard expected in normal use.

3. Composition/information on ingredients

• L-Threonine >= 98.5%

CAS-No. 72-19-5

Other information

This material is classified as not hazardous under OSHA regulations.

This product is intended for FDA regulated uses only.

4. First aid measures

4.1. Description of first aid measures

Inhalation

In case product dust is released: Possible discomfort: cough, sneezing

Move victims into fresh air.

Skin contact

No hazards which require special first aid measures.

Eye contact

Possible discomfort is due to foreign substance effect.

Rinse thoroughly with plenty of water keeping eyelid open.

In case of persistent discomfort: Consult an ophthalmologist.

Ingestion

Have the mouth rinsed with water.

After absorbing large amounts of substance

Consult a physician.

4.2. Most important symptoms and effects, both acute and delayed

4.3. Indication of any immediate medical attention and special treatment needed

After absorbing large amounts of substance:

Acceleration of gastrointestinal passage

5. Fire-fighting measures

5.1. Extinguishing media

Suitable extinguishing media: Water, mist, Foam

Unsuitable extinguishing media: quenching powder, Carbon dioxide (CO2)

5.2. Special hazards arising from the substance or mixture

In the case of fire, the following hazardous smoke fumes may

be produced: carbon monoxide, carbon dioxide, nitric oxides, hydrocyanic acid.

In the event of fire and/or explosion do not breathe fumes.

5.3. Advice for firefighters

Contaminated fire-extinguishing water must be disposed of in accordance with the regulations issued by the appropriate local authorities.

Fire residues should be disposed of in accordance with the regulations.

In the event of fire, wear self-contained breathing apparatus.

6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Wear personal protective equipment. Keep unauthorized persons away.

6.2. Environmental precautions

Obey relevant local, state, provincial and federal laws and regulations. Do not contaminate any lakes, streams, ponds, groundwater or soil.

6.3. Methods and material for containment and cleaning up

Absorb mechanically avoiding production of dust.

7. Handling and storage

7.1. Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

7.2. Conditions for safe storage, including any incompatibilities

Advice on protection against fire and explosion

Take precautionary measures against static charges, keep away from sources of ignition. Avoid dust formation.

Storage

Store in a cool and shaded area.

Keep containers dry and tightly closed to avoid moisture absorption and contamination.

German storage class

11 - Combustible Solids

Dust explosion class

St1

Method: VDI 3673
Maximum rate of pressure rise: 66 bar/s

Standardized max. rate of pressure increase, KSt: 66bar·m/s

8. Exposure controls/personal protection

8.1. Control parameters

exposure limit for dust		
CAS-No. Control parameters type of exposure	3 mg/m3 Respirable fraction. Suitable measuring processes are:	Time Weighted Average (TWA):(ACGIH)
	NIOSH method 0500 NIOSH method 0600	
Control parameters type of exposure	10 mg/m3 Inhalable particulate.	Time Weighted Average (TWA):(ACGIH)
Control parameters	15 mg/m3	Time Weighted Average (TWA) Permissible Exposure Limit (PEL):(OSHA Z1)
type of exposure	Total dust.	
Control parameters	5 mg/m3	Time Weighted Average (TWA) Permissible Exposure Limit (PEL):(OSHA Z1)
type of exposure	Respirable fraction.

Suitable measuring processes are:

NIOSH method 0500 NIOSH method 0600

DNEL/DMEL values

Remarks No substance-related safety assessment is necessary / has been conducted

for this product.

PNEC values

Remarks No substance-related safety assessment is necessary / has been conducted

for this product.

8.2. Exposure controls

Engineering measures

Use process enclosures, local exhaust ventilation or other engineering controls to control airborne exposure.

Take precautionary measures against static discharges. Earthing of equipment.

Personal protective equipment

Respiratory protection

A respiratory protection program that meets OSHA 1910.134 and ANSI Z88.2 or applicable federal/provincial requirements must be followed whenever workplace conditions warrant respirator use. NIOSH's "Respirator Decision Logic" may be useful in determining the suitability of various types of respirators.

Hand protection

Glove material Natural rubber (NR), for example, Cama Clean 708, Kächele-Cama Latex GmbH (KCL),

Germany

Material thickness 0.5 mm Break through time 8 h

Method DIN EN 374

Glove material Nitrile, for example, Dermatril 740, Kächele-Cama Latex GmbH (KCL), Germany

Material thickness 0.11 mm Break through time 8 h

Method DIN EN 374

The above mentioned hand protection is based on knowledge of the chemistry and anticipated uses of this product but it may not be appropriate for all workplaces. A hazard assessment should be conducted prior to use to ensure suitability of gloves for specific work environments and processes prior to use.

Eye protection

Safety glasses

Skin and body protection

No special protective equipment required.

Hygiene measures

Wash face and/or hands before break and end of work.

Cleanse and apply cream to skin after work.

Protective measures

Handle in accordance with good industrial hygiene and safety practice.

If there is the possibility of skin/eye contact, the indicated hand/eye/body protection should be used.

US Federal Regulations

OSHA

If listed below, chemical specific standards apply to the product or components:

None listed

Clean Air Act Section (112)

If listed below, components present at or above the de minimus level are hazardous air pollutants:

None listed

CERCLA Reportable Quantities

If listed below, a reportable quantity (RQ) applies to the product based on the percent of the named component:

None listed

SARA Title III Section 311/312 Hazard Categories

The product meets the criteria only for the listed hazard classes:

No SARA Hazards

SARA Title III Section 313 Reportable Substances

If listed below, components are subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

None listed

Toxic Substances Control Act (TSCA)

If listed below, non-proprietary substances are subject to export notification under Section 12 (b) of TSCA:

None listed

State Regulations

California Proposition 65

A warning under the California Drinking Water Act is required only if listed below:

None listed
