0.3. REVISION DATE: 01-25-2015

| 4 | FIRST AID MEASURES | 🕽 स्टेडिंग स्क्रांस हो सार्थ कर राज्य करा 📜 🔭 रेड एक्टना घरा । |
|------|--|--|
| 4.1. | General Advice: | First Aid personnel should pay attention to their own safety. Remove contaminated clothing. |
| 4.2. | Inhalation: | Remove person from exposure. Seek medical attention for any breathing difficulty. |
| 4.3. | Ingestion: | If swallowed, give several glasses of water to dilute. Never give anything by mouth to an unconscious person. May cause abdominal pain and nausea. Cobalt, Copper, Zinc & Selenium salts may have oral human lethal doses in the range of 50 to 500 mg/kg. |
| 4.4. | Skin Contact: | Wash affected skin with soap and water. |
| 4.5. | Eye Contact: | Flush eyes with water for at least 15 minutes. Seek medical attention as needed. |
| 5. | FIRE FIGHTING MEASU | JRES Lastic market and contributed by the season of the contribution of the contributi |
| 5.1. | Hazardous Combustion Products: | Oxides of carbon |
| 5.2. | Special Fire Fighting Procedures: | Extinguish with water fog, dry chemical powders or foam. Do not use strong streams of water or dry chemical if dust can be dispersed into the air. Dust placed in suspension with an ignition sources present may flash or explode. |
| 5.3. | Unusual Fire and Explosion Hazards: | Explosion hazard may exist for combustible dusts of certain particle size and moisture content when suspended in air at certain concentrations and subjected to an ignition source. |

6. ACCIDENTAL RELEASE MEASURES

Clean up with soft bristle broom(s) or a vacuum approved for a Class II Hazardous Location. Dust deposits should be maintained to a minimum on surfaces, as these could form an explosive mixture if they are released into the atmosphere in sufficient concentration. Avoid dispersal of dust in the air (i.e., cleaning dust surfaces with compressed air in the presence of ignition source should not be allowed). Non-sparking tools should be used.

7. HANDLING AND STORAGE TO THE DATE OF THE PARTY OF THE P

Avoid dispensing dust in air and exposure to potential ignition sources. Remove feed dust from area/processing equipment prior to using any heat producing equipment such as arc welders, cutting torches and spark/heat producing tools such as portable surface grinders.

Store in dry location.

| 8 | 8 EXPOSURE CONTROLS / PERSONAL PROTECTION | | | | |
|------|---|---|--|--|--|
| 8.1. | Respiratory Protection: | May cause irritation of the nasal membranes or the upper respiratory tract if dust exceeds the nuisance level. Wear an approved NIOSH dust respirator whenever dust concentrations in the work area are above ACGIH TLV/OSHA PELS. **OSHA PEL: 8 hour time weighted average of 15 mg/m³ total dust and 5 mg/m³ respirable dust. One or more of the mineral ingredients in this premix exceed 1% of the total mixture, therefore the entire mixture must be classified as hazardous according to 29 CFR 1910-1200 (d)(5)(ii). | | | |

| 8.2. | Ventilation: | Local exhaust (if needed |) | | | | |
| 8.3. | Mechanical (general): | If needed ensure that dustors, vessels, and process escape of dust into the v | If needed ensure that dust handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work areas. Use only appropriately classified electrical equipment and powered industrial trucks. | | | | |
| 8.4. | Protective Gloves: | N/A | | | | | |
| 8.5. | Eye Protection: | Safety glasses / goggles s | uggested in dusty conditions | | | | |
| 8.6. | Work / Hygienic Practices: | Good personal hygiene practices should be followed. Wash hands and face before eating, drinking, etc. Avoid dust accumulation and control ignition sources. Where appropriate, employ grounding, venting, and explosion relief provisions in accordance with accepted engineering practices in processes capable of generating dust and/or static electricity. Avoid accumulation of dust on surfaces to prevent secondary dust explosions. Refer to appropriate OSHA, NFPA and applicable standards. | | | | | |

^{**}Refer to individual tag and formulation information for actual concentrations.

Section (b)(5)(iii) of the HCS (CFR 1910.1200) exempts food, including feed and therefore any associated feed dust, from the labeling requirements of the HCS since the food/feed is subject to the labeling requirements of the Food & Drug Administration.

16. OTHER INFORMATION

Animal feed is comprised of whole and processed grains and may contain added vitamins and minerals. Feed components generally produce a limited amount of dust in manufacturing and handling of the material.

The information contained in this Safety Data Sheet, to the best of our knowledge, is believed to be accurate and reliable. However, it is without a warranty of any kind, expressed or implied and it is the user's obligation to determine the conditions of safe use of this product. For more specific information, please see MSDS's for each ingredient in the mixture.
